

## Lathe Power Skiving Unit

Gear cutting in short times on CNC lathe

Dentature in tempi ridotti sul tornio a CN

- External and internal gears with straight and helical teeth
- Machining of gears close to shoulders without interference
- Faster internal gear cutting when compared to gear shaping or broaching
- Dentature esterne ed interne a denti dritti ed elicoidali
- Esecuzione di dentature a ridosso di spallamenti senza interferenza
- Dentature interne in tempi sensibilmente inferiori rispetto alla stozzatura
